

The **Naval Research Enterprise Internship Program (NREIP)** provides an opportunity for college and graduate students to participate in research at a Department of Navy (DoN) laboratory.

ELIGIBILITY:

- **U.S. Citizens** (some labs make exceptions for Permanent Residents and dual citizens)
- **Undergraduate or Graduate students** enrolled at a four-year accredited college or university
 - Rising sophomores or equivalent; must be on track to complete freshman year by the start of the internship
 - Students graduating the spring semester before the internship or later (winter graduates are not eligible)
 - Applicants attending two-year colleges may be eligible at the lab/center's discretion
- Eligible to be granted a **security clearance**
- **Studying a relevant discipline** to the research interests of the laboratories

STIPEND & SELECTION:

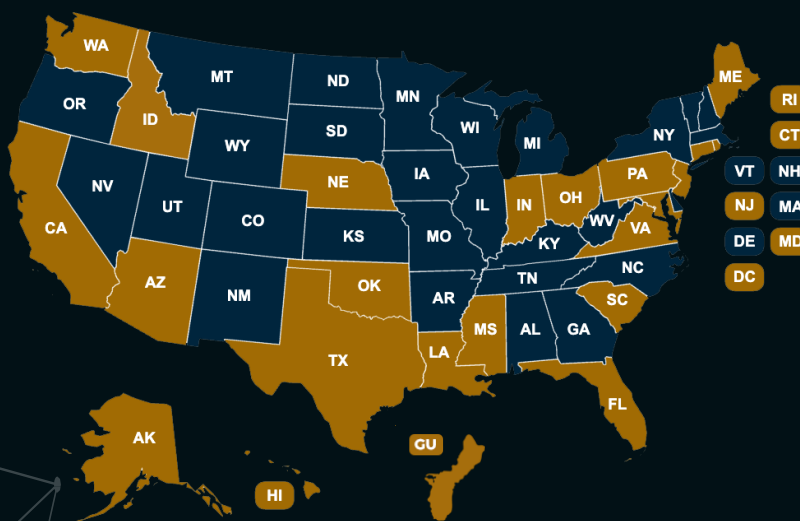

NREIP is a **continuous 10-week internship** and offers a **competitive stipend** for its interns:

- **\$7,500** for new undergraduate participants
- **\$9,000** for returning undergraduates
(students must have participated in NREIP and completed the full 10-week program in a prior year to receive this level)
- **\$11,500** for graduate students
(students must currently be in graduate school and taking graduate school courses to receive this level)

Selections are based upon:

- Academic achievement
- Personal statements
- Recommendations
- Career and research interests

With **60+ labs across more than 20 states & territories**, NREIP interns are matched with a mentor, participate in STEM research, and are exposed to DoN science & technology and research & development opportunities.

- FREQUENTLY ASKED QUESTIONS -

What is the timeline of the application process?

- **August 1st:** Application opens
- **November 1st:** Application closes
- **November 10th:** Recommendations due
- **November-January:** Applications under review
- **Mid-January-March:** Award offers sent

When does the internship take place and for how long?

The NREIP internship takes place for **10 consecutive weeks** during the summer. Internships typically begin between the middle of May to the end of June, though exact start and end dates vary depending on the laboratory's schedule. Interns are required to **work five days a week, 40 hours per week, not to exceed 400 hours over a 10-week period.**

I am about to graduate college. Am I eligible for NREIP?

Yes, but only if you are graduating in the spring before the summer internship. Those graduating in the winter and not enrolling in further education in the semester prior to the internship are not eligible.

Can I choose which lab I work at?

Yes, you can indicate your top three lab preferences on your application, however, all applications are automatically distributed to all participating labs regardless of region.
